

Lady Terra

Outstanding through above-average yield

Lady Terra excels with consistently above-average yields and is a good option for French fries processing. This variety has strong early maincrop plants and a high stress resistance.

	Lady Terra
Yield	Very High
Underwater Weight	420
Dry Matter %	22.8
Maturity	Early
Dormancy	Medium
Bruising (*1)	8
Spraying (*1)	7
Common scab (*1)	7
Powdery scab (*1)	8
Late Blight (*1)	4
Tuber Shape	Long/Long Oval
Skin Colour	Yellow
Flesh Colour	Light Yellow
Eye Depth	Very Shallow
Potato Cyst Nematodes Ro1 (*1)	8
Potato Cyst Nematodes Ro2/3 (*1)	1
Potato Cyst Nematodes Pa2 (*1)	4
Potato Cyst Nematodes Pa3 (*1)	3
Wart Disease (*1)	Immune

(*1): 9 = resistant, 1 = very susceptible

Characteristics

- Consistently above average yields
- High stress resistance
- Variety of chips with strong plants
- Suitable for most soil types
- High tuber numbers, low input cost
- Excellent fry colours, suitable for medium to long term storage

Economics

Nitrogen Variety Group	Very low	
Standard Seed Size	35 x 45 x 55	
Approx Seed Rate t/ha	1.85 t	
Approx Seed Rate t/ac	0.75 t	
Storage	8°C	7 months
